Category:	Gantt	Estimated time:	0.00 hour
Target version:			
Resolution:			
<b>Description</b> For example, I have 10 issues created around 2015.9.25, and be expected to be done around 2015.10.2. When it is 2015.10.1, I am checking the gantt chart, the chart starts from 2015.10.1, it feels not so conformtable. So can it be configured in such a way: m months before the current month and n months after the current months? Thanks.
