Redmine - Defect #2090

Redmine.pm Error

2008-10-26 00:14 - Steven Lu

Status:	Closed		**Start date:**	2008-10-26
Priority:	Urgent		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description

When trying to log into the SVN via Apache2 http:// with the proper credentials, it does not log me in.

Here is my apache server log.

```
DBD::mysql::st execute failed: called with 2 bind variables when 0 are needed at /opt/redmine/extr
a/svn/Redmine.pm line 278.
DBD::mysql::st fetchrow_array failed: fetch() without execute() at /opt/redmine/extra/svn/Redmine.
pm line 281.
```

History

#1 - 2008-10-26 16:26 - Steven Lu

- Status changed from New to Resolved

The guide in the Wiki is incorrect. Here's what I did.

I copied Redmine.pm to /usr/lib/perl5/Apache
Then loaded the following configuration script:

```
PerlLoadModule Apache::Redmine
<Location />
    DAV svn
    SVNParentPath "/var/svn"

    AuthType Basic
    AuthName redmine
    Require valid-user

    PerlAccessHandler Apache::Authn::Redmine::access_handler
    PerlAuthenHandler Apache::Authn::Redmine::authen_handler

    RedmineDSN DBI:mysql:database=redmine;host=localhost

    RedmineDbUser xxxxxxxxxx
    RedmineDbPass xxxxxxxxxx
</Location>
```

#2 - 2008-10-26 16:28 - Steven Lu

Can someone please blot out my username and password?

#3 - 2008-10-27 13:31 - Jean-Philippe Lang

Actually, the wiki documentation applies to latest stable release (0.7) of Redmine.pm.
This will be updated on 0.8 release. Thanks.

> Can someone please blot out my username and password?

Done.

#4 - 2008-10-27 21:22 - Steven Lu

I could also give you a guide on how to https secure the SVN and let only redmine access the repository through localhost port 80.

#5 - 2009-12-26 12:58 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Resolution set to Fixed

Documentation is fixed.
