Redmine - Defect #20908

rails dependency is too strict

2015-10-05 22:27 - Antonio Terceiro

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	3.1.1

Description

I maintain Redmine in Debian. Currently the Gemfile specifies a specific rails version, instead of a minimum required version. This makes it really hard to maintain packages. Please consider the attached patch, which specifies a minimum required version (4.2.4), but will also work with anything newer than that.

History

#1 - 2015-10-05 22:27 - Antonio Terceiro

- File 0001-Relax-rails-dependency.patch added

the patch

#2 - 2015-10-06 01:24 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Wont fix

Rails minor version updating broke Redmine many times.
We have fixed many times.
We discussed this policy long time ago. (but I cannot find this discuss.)
