I wrote a patch to solve these two problems.  
(It may be better to divide the issues...)

images links are incomplete with "/redmine/xxx". Full path to images is expected to see them.

TOC items hierarchy is not supported, only one-level list is exported

☐☐→ [0002-Nest-the-exported-html-table-of-contents.patch](#)

By applying the patch, I think the exported HTML will be easier to see.

The patch is identical to [#16446](#), which I have just committed as [r17229](#). Let's discuss the patch 0002 on this issue.

I did not notice that the same patch already exists.  
I am glad that the image link has been changed to a Full path.

Patch 0002 changes the heading of exported wiki HTML as follows. (Nest wiki titles)
