I wrote a patch to solve these two problems.

(It may be better to divide the issues...)

| *images links are incomplete with "/redmine/xxx". Full path to images is expected to see them.*

☐☐ → attachment:0001-Change-the-file-path-of-html-image-to-be-exported-to.patch

| *TOC items hierarchy is not supported, only one-level list is exported*

☐☐ → attachment:0002-Nest-the-exported-html-table-of-contents.patch

By applying the patch, I think the exported HTML will be easier to see.

The patch is identical to #16446, which I have just committed as r17229. Let's discuss the patch 0002 on this issue.

I did not notice that the same patch already exists.  
I am glad that the image link has been changed to a Full path.  
Patch 0002 changes the heading of exported wiki HTML as follows. (Nest wiki titles)

|            |           |
|------------|-----------|
| before     | after     |
| before.png | after.png |
