

Redmine - Defect #20925

Tracker selection combo is not visible

2015-10-07 07:57 - Deepak P

Status:	Needs feedback	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:		Affected version:	2.5.1
Resolution:			
Description			
Environment: Redmine version 2.5.1.stable Ruby version 1.9.3-p231 (2012-05-25) [i386-mingw32] Rails version 3.2.17 Environment production Database adapter Mysql2 SCM: Subversion 1.8.5 Git 1.9.0 Filesystem Redmine plugins: redmine_archive_issue_categories 0.1.1 redmine_custom_values_projects 0.0.1 redmine_custom_workflows 0.1.1			
Precondition: 1. There are multiple trackers defined (Requirements, Clarifications, Issues, etc) 2. There are multiple roles defined (Lead, Developer, Tester, etc) 3. Not all trackers are accessible by Developer role (It is set as read only for all fields in workflow admin page including "Trackers" field for particular tracker, say Requirements) 4. Trackers are displayed in the following order in "Trackers" page in admin section <ul style="list-style-type: none">a. Requirmentsb. Clarificationsc. Issues			
5. All trackers are added in a project.			
Steps: Add a user with developer role in a project which is having all the above trackers. Try to create a new issue with developer role			
Actual: Only "Status" combo box will be visible.			
Expected: All fields that are to be visible for the particular role should be visible in the new issue report page. in this case the "clarifications" tracker shall be shown for developer role.			
Workaround: Set the Tracker visibility 'view-able' for all trackers regardless of roles defined in "Workflow" admin page.			

History

#1 - 2015-11-03 06:48 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Redmine 2.5 is not maintained. Try on recent version.
