Description

I'm a complete Redmine (and Ruby) newbie, and I'm evaluating migrating from Trac.

ruby 1.8.6, rails 2.1.2, MySQL 5.0.51a and Redmine SVN trunk ([r1957](#))

I imported a project using rake redmine:migrate_from_trac, and now when I try to open Redmine's wiki it crashes with:

```

History

It looks like if the DB isn't migrated. Try migrating your (backedup!) DB (assuming you're working in the production-environment) using:

```
rake db:migrate RAILS_ENV="production"
```

#2 - 2008-10-28 15:48 - Thomas Lecavelier

Met this error with a IRC user: I wasn't able to find out the problem. It looks like db:migrate silently does nothing. Maybe something with the mysql strict mode?

Looks like [#1681](#).
