SCM:

Subversion 1.8.10

Git 1.9.5

Filesystem

Redmine plugins:

no plugin installed

We have found that when more than one person tries to edit an issue at the same time, we experience a loss of data. I couldn't find any report of this in the known bugs list, or any mention in the FAQ. I did a general search as well, and the only similar issue was for a wiki problem. [#2876](#)
