Redmine - Defect #21056

Project specific TimeEntryActivity name not updating properly

2015-10-23 18:18 - Stephane Evr

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Go MAEDA	**% Done:**	0%
Category:	Time tracking	**Estimated time:**	0.00 hour
Target version:	5.0.0		
Resolution:	Fixed	**Affected version:**	3.2.2

Description

In Enumerations, create a new TimeEntryActivity with these settings:

enum_01.PNG
Go in a project / settings / Activities (time tracking) the activity is listed properly:

enum_02.PNG
Enable the activity, and save.

Then, in the Enumerations page, change the name of the activity and save.

enum_04.PNG
Now, go back to project / settings / Activities (time tracking):

enum_03.PNG
Expected: The name of the activity should be updated to the new name (Test B).

Note that I can force the update by clicking on the "Reset" button on the same page, but I then loose all of my other activities settings for the project...

Same problem after reloading the page, I will test with 3.1.2 to see if it is fixed.

Could reproduce the issue on 3.2.1-stable... I followed exactly the steps as described.

#7 - 2016-03-18 12:47 - Stephane Evr

Note that I think this issue is really annoying. This means that the projects will always keep the old activity names, resulting in discrepancies in the time entry activities reports...

#8 - 2016-03-18 12:51 - Stephane Evr

#20018 Is a consequence of this issue

Could reproduce the bug as described on a freshly launched Bitnami redmine demo instance (https://bitnami.com/launch/redmine/aws/now):

```
Environment:
  Redmine version                3.2.1.stable
  Ruby version                   2.1.8-p440 (2015-12-16) [x86_64-linux]
  Rails version                  4.2.5.2
  Environment                    production
  Database adapter               Mysql2

#17 - 2017-07-10 23:11 - Marius BĂLTEANU

The issue still reproduces on 3.4.1.

#18 - 2021-06-03 14:36 - Sébastien Douheret

Problem still exists in 4.0.4 - stable.
Any change to have a fix or a workaround ?

What I don't understand, in my case some projects only use the system activities (IOW enumerations with parent_id = NULL) and other projects use duplicate activities (activities with parent_id != NULL).
Any explanation about system versus project activities logic in redmine is welcome, it will help me to understand and propose a fix.

Thanks in advance.

- File diff.patch added

Let's take the data of #21056#note-15 as an example.
"Administration> Enumerations> Activities (time tracking) New value" will create data like 33.
Then, when you save the settings for each project, data with project_id such as 41 or 45 will be generated.
I expect the 41 and 45 names to be updated when the 33 name is updated, but that's not really the case.

I have attached a patch that will automatically update 41 and 45 names when 33 name is updated.

Since the bug that the name is not updated has existed for a long time, it is possible that there is a project that has been used for a long time without being renamed.
I thought that it might be a problem if I change it suddenly with this change, so I try not to update the ones whose names are already inconsistent.(name: self.name_before_last_save)

- File diff-v2.patch added

I fixed it because it contained unnecessary code.
