Redmine - Patch #21119

Give numbers in query sort criteria consistent width for non-monospaced fonts

2015-10-31 15:29 - Felix Gliesche

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**

Target version:	3.2.0			

Description

When working with non-monospaced fonts (varying width of glyphs) the sorting criteria dropdowns are not aligned to the same vertical line (see screenshot).

This patch adds a span including a class (query_sort_criteria_count) to these numbers and adds a min-width to this element. It does not change the current look for monospaced fonts.
