Description					
Using Redmine I hav	ve problems linking with SCM (Sub	oversion), because:			
 Each project us between projec I can link only c 	one SCM repository to a project.), with some of	them shared
	ne high-level project, one for macro macro-area to SCM repository, ho				
It seems not to be a	good idea.				
I've changed ./app/m	nodels/changeset.rb, and with this	patch I can see now the revision	link on my Issue	e:	
* * * * * * * * * * * * * * *					
*** 83,88 ****

	= match[0]				
-	<pre>issue_ids = match[1].scan</pre>				
	issues = repository.proje	ct.issues.find_all_by_id	(target_issu	ie_ids)	
+ + #Ora i	child				
<pre>+ #ofa 1 child + Project.find(:all, :conditions => ["parent_id = ?", repository.project.id]).each { cp </pre>					
+ target_issues = target_issues + cp.issues.find_all_by_id(target_issue_ids)					
+ }	<u> </u>	·	. <u> </u>		
+					
	status && fix_keywords.ind	clude?(action.downcase)			
<pre># update status of issues logger.debug "Issues fixed by changeset #{self.revision}: #{issue_ids.join(', ')}." if 1</pre>					
ogger && logger	-			,	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
I suppose that some Any idea on how to r	sion number I get a 404 error, not f one else have the same problem, resolve my error ? a better idea on how to review my	matching funcional view with proj		pement) view.	
Thanks a lot, Andrea

History

#1 - 2024-02-26 22:04 - Holger Just

- Status changed from New to Closed

- Resolution set to Fixed

Fir quite some time, you can

- have multiple repositories per project (#779)
 link to issues in any project (#3087)

As such, I believe your patch is not necessary anymore and your requirements can all be met with basic Redmine.
