<b>Description</b>			
In every other part of the application issues have their CSS classes added to the <b>tr</b> element. This patch adds them to the sub tasks and relations tables for issues#show. It is useful for custom themes to be able to style them according to their status/tracker or for JavaScript plugins doing funky front end logic with them.

Hi,

This patch introduced a duplication of the 'issue' css tag because it is also provided by the **css\_classes** method. Can it be fixed ?

Thanks a lot.
