

Redmine - Defect #21479

Including a wiki page from another project does not resolve that page's links properly

2015-12-10 21:25 - lyad Kandalaft

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	2.6.0
Resolution:			
Description			
<p>When including ProjectA's wiki page from a wiki page in ProjectB, the links in the included page don't resolve correctly. As an example, the links in ProjectA:Wiki_page has a link to ProjectA:wiki_page2 . When ProjectA:Wiki_page is included inside ProjectB:Wiki_page, the link actually points to ProjectB:wiki_page2. The work around is to include the project identifier in every link on ProjectA.</p>
