Redmine - Defect #21479

Including a wiki page from another project does not resolve that page's links properly

2015-12-10 21:25 - Iyad Kandalaft

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**

Category:	Wiki		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.6.0

Description

When including ProjectA's wiki page from a wiki page in ProjectB, the links in the included page don't resolve correctly. As an example, the links in ProjectA:Wiki_page has a link to ProjectA:wiki_page2 . When ProjectA:Wiki_page is included inside ProjectB:Wiki_page, the link actually points to ProjectB:wiki_page2. The work around is to include the project identifier in every link on ProjectA.

```
Environment:
  Redmine version          2.6.0.stable
  Ruby version             2.0.0-p481 (2014-05-08) [x86_64-linux]
  Rails version            3.2.19
  Environment              production
  Database adapter         Mysql2
SCM:
  Subversion               1.8.8
  Git                      1.9.0
  Filesystem
Redmine plugins:
  redmine_mylyn_connector   2.8.2.stable
