- deeper black for headings (#content h1, h2, h3, h4)
- vivid color for header (#top-menu / #header)
- blighter gray for sidebar (#main {background-color})
- deeper brack for headings in sidebar (#sidebar h3)
- blighter gray for boxes (.box)
- blighter gray for inactive tabs (#content .tabs ul li a)
- lighter yellow for issues (div.issue)
- blighter gray (same color with wiki.pre {background}) for wiki diff background (.text-diff)
- blighter gray for scm background (table.filecontent / table.annotate td.line-code)

This patch is really changes readability in right way.

##### #3 - 2016-10-24 05:42 - Toshi MARUYAMA

- Target version set to 3.4.0

##### #4 - 2016-12-18 10:29 - Jean-Philippe Lang

- Target version deleted (3.4.0)

Tastes and colors... I personally prefer the current colors over the proposed changes (header would be too dark for me).

##### #5 - 2017-03-08 10:39 - Go MAEDA

Thanks for your feedback.

I have updated the patch. The new patch does not change header color, only improves the readability of texts. I think current colors of texts are too light.

The second patch improves readability. Please take a look again.
