Redmine - Defect #2157

Problem in Wiki Page about SVN Setup

2008-11-10 15:59 - Skaag Argonius

Status:	Closed	**Start date:**	2008-11-10
Priority:	Normal	**Due date:**	
Assignee:	Nicolas Chuche	**% Done:**	0%
Category:	Wiki	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

The URL in question contains incorrect information:

http://www.redmine.org/wiki/redmine/Repositories_access_control_with_apache_mod_dav_svn_and_mod_perl#Apache-configuration-for-subversion-repositories-and-redmine-after-07X

It should read like this:

First copy Redmine.pm to /usr/lib/perl5/Apache
Then load the following configuration script:

```
PerlLoadModule Apache::Redmine
<Location />
    DAV svn
    SVNParentPath "/var/svn"

    AuthType Basic
    AuthName redmine
    Require valid-user

    PerlAccessHandler Apache::Authn::Redmine::access_handler
    PerlAuthenHandler Apache::Authn::Redmine::authen_handler

    RedmineDSN DBI:mysql:database=redmine;host=localhost

    RedmineDbUser xxxxxxxxxx
    RedmineDbPass xxxxxxxxxx
</Location>
```

By the way if you grant me editing access, I will fix such things when I find them.
This should help you guys a bit, I guess?
Anyway for your consideration. Many thanks! :-)

History

#1 - 2008-11-11 10:27 - Jean-Philippe Lang

- Target version deleted (0.7.3)

- Affected version (unused) deleted (0.7.3)

- Affected version deleted (0.7.3)

#2 - 2008-12-12 03:54 - Chris Miller

Please updated this soon! This took me the better part of two hours to diagnose until stumbling upon this bug (after wondering "hey, someone might also be having trouble!")

If possible revert Redmine.pm so that it doesn't have to be moved to /usr/lib/perl5/Apache, as that makes updating difficult...

Before:

```
cd /opt/redmine
svn switch http://redmine.rubyforge.org/svn/tags/YourVersionHere
```

```
svn up
rake db:migrate RAILS_ENV="production"
<restart the app however you need>
```

After we have to annex:

```
mv -f /opt/redmine/extra/svn/Redmine.pm /usr/lib/perl5/Apache
```

#3 - 2008-12-15 13:01 - Nicolas Chuche

- Status changed from New to Closed

- Assignee changed from Jean-Philippe Lang to Nicolas Chuche

Ok done

> If possible revert Redmine.pm so that it doesn't have to be moved to /usr/lib/perl5/Apache, as that makes updating difficult...

Did you try to do a link instead of moving Redmine.pm ?

```
svn up
rake db:migrate RAILS_ENV="production"
<restart the app however you need>
```

After we have to annex:

```
mv -f /opt/redmine/extra/svn/Redmine.pm /usr/lib/perl5/Apache
```
