Description Dear all, it's possible to have a easy to use GUI for create a module? I need to improve my Redmine installation but i'm not really able to do that. How many people are in my condition? For example I need to create a new tab in my projects with "upload documents", checks, text boxes, etc... and the plug-ins are not really user friendly. Can you create a new setting like "custom fields" for modules?
