Description

It is inefficient in larger subtree - it would be nicer with pluck, but it would still result in ugly queries with more projects. Best way is to use subquery in that cases

The patch breaks a few tests. It displays issues from subprojects even if display_subprojects_issues setting is disabled.

#5 - 2016-01-03 19:45 - Ondřej Ezr
- File query_project_statement_2.diff added

I see... I forgot one case in the statement.
