Redmine - Defect #21701

Using the filter "Assignee's Group" in the issue list shows all groups

2016-01-12 14:56 - Robert Barnebeck

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues filter		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	3.1.2

Description

When a user is restricted to only one project, where for example only two user groups are added, the user can nevertheless see all groups from the whole application. We name the groups after our customer companies, so every customer can see all other customer companies, which is too much transparacy for us ;-)

History

The same problem seemed to be here two years ago: [#15789](#)

#2 - 2016-01-12 15:18 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Did you try [#11724#note-25](#)?

Okay, now it works. I did configure this not in the right way, I think: I did set this option to the value "Members of visible projects". But the user was also in other roles, where the setting was "all active users". So I have to make sure that all roles a customer can get, the setting has to be "Members of visible projects".

Thanks and sorry for this mistake ...

#4 - 2016-01-12 16:02 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Thank you for your feedback.
