

Redmine - Feature #21777

Include tmp/sessions/ folder in repository, please?

Description			
<p>Hi,</p> <p>Sorry, I'm not sure if this is a feature or defect.</p> <p>tmp/sessions folder is needed in production and if it's pulled down with the repository, then it would save an extra step later to create the folder.</p> <p>Here are the changes to get things working in Git: https://github.com/redmine/redmine/pull/71</p> <p>Thanks!</p> <p>PS: Why not just use Git and Github? Having to sign up for another account is a bit inconvenient. But either way, thanks for an awesome product!</p>

You can make by "rake tmp:create" and I am afraid of side effect.

```
$ rake tmp:create
mkdir -p tmp/sessions
mkdir -p tmp/cache
mkdir -p tmp/sockets
mkdir -p tmp/pids
mkdir -p tmp/cache/assets/development
mkdir -p tmp/cache/assets/test
mkdir -p tmp/cache/assets/production
```
