

Redmine - Patch #218

Patch for issue #9393 - fast closing of issues

2007-04-15 10:44 - Daniele Mazzini

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description <p>This patch adds a "select" to the issues listed in my/page and project/list_issues. The select show the current issue status, and a list of possible statuses for the current logged in user. If a new status is selected, the change status action is called.</p> <p>Functionally, what is missing (from my point of view) is a redirect to the list from where the new status was selected, after the new status is saved (currently we are redirected to the complete issue view).</p> <p>It would also be good to fix the look of that select (it is too big) and, maybe, how parameters are passed to "authorize_for", but I wouldn't go so far!</p> <p>Hope to hear soon from some developer :)</p> <p>Dan</p>			

History

#1 - 2008-02-26 22:50 - Jean-Philippe Lang

- Status changed from New to Closed

Faster closing is now possible using the context menu on the issue list.
