Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.5.2

Description

Hello,

just in the process of upgrading version 2.5.1.stable (installed on debian wheezy from wheezy backports) to 2.5.2.devel (debian jessie) and now I get the following error in production.log when trying to access the upgraded redmine instance:

Started GET "/redmine/" for 192.168.199.1 at 2016-01-29 13:05:29 +0100
Processing by WelcomeController#index as HTML
Completed 500 Internal Server Error in 7ms

ArgumentError (comparison of Time with BigDecimal failed):
app/models/setting.rb:229:in `<='
app/models/setting.rb:229:in `check_cache'
app/controllers/application_controller.rb:98:in `user_setup'

What can I do to fix this problem? Please assign a proper category to this ticket, I dunno what the proper category for this would be.

TIA,

--
Stefan

History

#1 - 2016-01-29 14:48 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid

Redmine 2.5.x is not maintained.
You should ask Debian team.

#2 - 2016-01-29 15:00 - Stefan Kuhr

Oh my, I found this: http://www.redmine.org/boards/2/topics/46006

This fixed the problem in this ticket though the next problem just waited to raise its ugly head: Defect #21878. Just wanted to add this to this ticket in case someone runs into the same problem.
