<b>Description</b>	
<p>I want to export structured PDF's from wiki, Internal Links in Wiki Articles are ok in html format , but are broken in PDF. Eg. &lt;a class="wiki-page" href="#Not-Supported"&gt;Not Supported&lt;/a&gt; is ok in Redmine, and HTML export, but is not ok in PDF.</p> <p>I'm trying also to find usable Solution for it which also supports proper formatting like page header, footer, Page Numbers etc.</p> <p>Could you please advise ?</p>
