

Redmine - Feature #2204

When creating PDF of the issue list use the same columns as shown on web page.

Description When a PDF of the issues list is generated the columns (#, Tracker, Status, Priority, Assigned to, Updated, Subject) are always used. It would be good (better?) if the PDF was generated with the same columns as shown in the browser. That way the output of a custom query with custom columns can be PDF'd. To me this is more intuitive.
