

Redmine - Feature #22044

to fetch all accesskey of users in our local redmine

2016-02-16 08:53 - khadeer ahmed

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description			
I need all the user accesskeys present in a token table in java. is there a way to create our own customized script and run via java.
