Description I would like to have the name of the project shown in the ticket's detail page. When I receive a new ticket via email, I arrive to the ticket page and have to go one level up to see to what project does the ticket belong.

Project name is displayed in the application header, isn't it?

You are right, the problem was that the name of the project was the same as the name of the redmine installation... I'm marking this as resolved. Thanks for the feedback :)
