

## Redmine - Defect #22077

### PDF issue export

2016-02-18 09:56 - Oleg Fedotkin

<b>Status:</b>	Needs feedback	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	PDF export	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	
<b>Resolution:</b>			
<b>Description</b>			
Hello. I'm using redmine 3.2.0-stable, and also I'd like to emphasize there wasn't such problem when I was using 3.1.0-stable. When I export issue to PDF, the file seems pretty corrupted if there're Cyrillic characters present (e.g. screenshot).  Affected browser version: 48.0.2564.82 Ubuntu 14.04 (64-bit) On Firefox PDF export works perfectly.

### History

#### #1 - 2016-02-18 12:03 - Toshi MARUYAMA

- File centos7-mate.png added

- Status changed from New to Needs feedback

I don't know about your pdf viewer, but I think your its problem.

On my CentOS7.

```
$ LANG=C atril --version
MATE Document Viewer 1.12.2
$ rpm -qf `which atril`
atril-1.12.2-1.el7.x86_64
```

#### #2 - 2016-04-04 14:18 - Maksim Khitrin

- File example-adobe-reader.png added

- File example-google-chrome.png added

I have faced the same problem. Finally I found out that it happens when you open PDF document inside Google Chrome as it does when you download the file. But if you open it with Adobe Reader everything works fine.

My environment:

Environment:

```
Redmine version      3.2.1.stable
Ruby version         2.2.4-p230 (2015-12-16) [i686-linux]
Rails version        4.2.5.2
Environment          production
Database adapter     Mysql2
```

SCM:

```
Subversion          1.6.17
Git                 1.7.10.4
```

Filesystem

Redmine plugins:

```
redmine_lightbox2   0.2.5
```

#### #3 - 2016-05-13 01:55 - Toshi MARUYAMA

- Related to Defect #22807: rbpdf 1.19.0 breaks the encoding added

#### #4 - 2016-06-20 16:33 - Martin Šlemr

Same problem happened to me.

```
Redmine version      3.2.3.stable
Ruby version         2.0.0-p384 (2014-01-12) [x86_64-linux-gnu]
Rails version        4.2.5.2
```

Both redmine server and client are running Ubuntu 14.04. Your note is right, problem is related only to Chrome browser (actually 51.0.2704.84 (64-bit))

#### #5 - 2016-06-20 16:37 - Martin Šlemr

- *File issues (41).pdf added*

Update: PDF document isn't perfect in Firefox too (czech encoding is broken), Ubuntu's PDF Viewer (Evince 3.10.3) shows it correctly.
