Description			
Hi,			
I don't need use gloc at all in init.rb of plugins, but this time i need to translate some links to insert in top_menu, but gloc doesnt work there, i did a quick fix to insert in every plugin to GLoc work, it was in Redmine::Plugin but i dont want to insert anything in core so i moved to plugins i need			
<pre>Redmine::Plugin.send(:include, GLoc) require "#{RAILS_ROOT}/config/initializers/30-redmine"</pre>			
Have any general and better way to do this?			
Thanks!			

History

#1 - 2008-11-18 14:31 - Chaoqun Zou

In my plugin I write code like this and it works.

```
menu :project_menu, :books, { :controller => 'books', :action => 'index'}, :caption => :label_library, :param => :project_id
```

#2 - 2008-11-18 14:36 - Diego Sousa

- Status changed from New to Resolved

- % Done changed from 0 to 100

Sry, my bad!

i was doing this

```
menu :top_menu, l(:label_report), { :controller => 'report', :action => 'index' }, :after => :administration
```

Thanks Zou! :)

#3 - 2008-11-18 18:04 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Affected version (unused) deleted (devel)
