

Redmine - Defect #22119

Error: Data too long for column 'notes' when copy paste pictures

2016-02-29 10:23 - Thomas Koch

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	3.2.0
Resolution:	Duplicate		
Description			
<p>I was copy&pasting some text with an Picture to the Issue notes. It gave me an awesome (working) preview, but a Redmine 500 error while saving (Internal error page was shown). My log-file reads:</p>			
<pre>ActiveRecord::StatementInvalid (Mysql2::Error: Data too long for column 'notes' at row 1: INSERT INTO `journals` (`journalized_id`, `journalized_type`, `user_id`, `notes`, `created_on`) VALUES (8127, 'Issue', 104, '<p></p><r\n', '2016-02-29 10:11:41')): app/models/journal.rb:67:in `save' app/models/issue.rb:1659:in `create_journal' app/models/issue.rb:182:in `create_or_update' app/controllers/issues_controller.rb:487:in `block in save_issue_with_child_records' app/controllers/issues_controller.rb:475:in `save_issue_with_child_records' app/controllers/issues_controller.rb:180:in `update' lib/redmine/sudo_mode.rb:63:in `sudo_mode'</pre>

History

#1 - 2016-02-29 12:50 - Go MAEDA

What is the size of the text and what database do you use?
I guess the text is longer than 64KB and the database is MySQL.

#2 - 2016-03-14 14:15 - Thomas Koch

Yes, Mysql (as the error shows as well)
I do not know the size of that image, but I guess it will be more the 64kB.

#3 - 2016-03-15 03:55 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Duplicate

The size of issue.description and journal.notes are limited to 64KB on MySQL for now.
Closing this issue as a duplicate of [#19869](#).

#4 - 2016-03-15 03:55 - Go MAEDA

- Is duplicate of Feature #19869: Consider increasing the size limit of description and note columns for tickets added

#5 - 2016-03-16 11:04 - Thomas Koch

Converting the whole database from utf8 to utf8mb4 solve this issue! (see: [#21398](#))

The data type of all text fields got automatically changed from text to mediumtext, which can hold up to 16MB!

Redmine should catch this exception and give more details. Same here: [#21398](#)!
