Description	
<p>Hello,</p> <p>My team is using LaTeX for documents, it would be great if we could collaborate to create documents using the wiki and then export to LaTeX for including in other documents.</p> <p>I found that RedCloth 4 is able to export to LaTeX but at I read in #1754 that Redmine could not easily upgrade to RedCloth 4.</p> <p>So, I'm just reporting that it could bring a feature that could be useful to some of us.</p> <p>Thanks,</p> <p>Gael</p>

Since #1754 is fixed, does this mean Latex export could be implemented relatively easily?

#3 - 2010-09-02 05:21 - Jean-Baptiste Barth

#1754 only fixes support for Redcloth 3.x branch. Redcloth 4 is not supported yet but I opened an issue for that, see #6269
