bundler error: Ruby 1.9.3 = "mime-types-data requires Ruby version >= 2.0."

Error message encountered when running bundle update from my Redmine installation directory:

Gem::InstallError: mime-types-data requires Ruby version >= 2.0.
An error occurred while installing mime-types-data (3.2016.0221), and Bundler cannot continue.
Make sure that `gem install mime-types-data -v '3.2016.0221` succeeds before bundling.

Redmine installation details (taken once I restored the installation directory from backup):

sh: 1: darcs: not found
sh: 1: cvs: not found
sh: 1: bzr: not found
Environment:
  Redmine version 3.2.0.stable.14966
  Ruby version 1.9.3-p0 (2011-10-30) [i686-linux]
  Rails version 4.2.5.1
  Environment production
  Database adapter Mysql2
SCM:
  Subversion 1.6.17
  Mercurial 2.0.2
  Git 1.7.9.5
Filesystem
Redmine plugins:
no plugin installed

Does Redmine still support Ruby 1.9.3? I looked at the [RedmineInstall] page and it is still listed there. From what I can recall you guys don't have a habit of switching requirements in the middle of maintaining a branch, so I figured this was something that folks just haven't reported yet.

P.S.

I use a Subversion tag for the installation. I then just switch tags when it is time to upgrade to a new version and then run the applicable upgrade steps.

Thanks! I modified Gemfile to include that change and it allowed me to complete the 3.2.0 to 3.2.1 upgrade without issue.
