Category:	UI - Responsive	Estimated time:	0.00 hour
Target version:	3.2.2		
Description			
<p>On small screens: While the directory listing table may be scrolled horizontally, the revision table may not. Therefore the commit message and author is not available on mobile devices.</p> <p>before.png</p> <p>The attached patch adds an .autoscroll container around the revision graph and table. Additionally it adds position: relative to the .autoscroll CSS ruleset to ensure, that the revision graph scrolls with the table content.</p> <p>after.png</p> <p>The patch was created based on the current trunk r15287.</p>
