

Redmine - Defect #22404

Cannot create new issue if proxy has been set up

2016-04-06 05:54 - Hieu Nguyen

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Target version:		Affected version:	
Resolution:	Invalid		
<b>Description</b>  I've set up new Redmine server. And it works perfectly. But some of my friends living in Japan cannot create new issue on my Redmine. Log-in is OK. But when click New issue, input information and press Save, they get 500 Internal Server Error. So I tried to set my proxy as 179.107.182.187:80 (for example), and also get same error.  Environment: Redmine version            3.2.1.stable Ruby version               2.1.4-p265 (2014-10-27) [x86_64-linux] Rails version              4.2.5.2 Environment                production Database adapter            Mysql2
