

Redmine - Feature #22425

Allow "style" tag in Redcarpet Markdown formatter

2016-04-08 08:18 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:			
Resolution:	Wont fix		
Description There are no means of styling text (such as color, font-size, ...) in Markdown formatter. Please allow "style" tag to let users decorate text.

+1

I also want to set the text color on markdown.

There was a related discussion at the URL below.

<https://www.redmine.org/boards/2/topics/56096?r=57052>

You can fix it with the following modification,
but I am worried about the security risk.

redmine/lib/redmine/wiki_formatting/markdown/formatter.rb

```
Redmine::WikiFormatting::Markdown::HTML.new(  
  :filter_html => false
```

Wouldn't it be possible to reduce the risk of security by additionally setting safe_links_only => true ?

```
Redmine::WikiFormatting::Markdown::HTML.new(  
  :filter_html => false,  
  :safe_links_only => true
```

In my environment, I can do these two settings and use the style tag to set the text color.

- Related to Defect #37237: Common Markdown Formatter does not render all properties on HTML elements added

#6 - 2022-09-26 20:22 - Mischa The Evil

- Subject changed from Allow "style" tag in Markdown formatter to Allow "style" tag in Redcarpet Markdown formatter

#7 - 2022-09-27 00:06 - Mischa The Evil

- Status changed from New to Needs feedback

@Go MAEDA: I think we can close this issue as "Wont fix" now that the Redcarpet-based Markdown formatter has been superseded by the new CommonMark Markdown (GitHub Flavored) formatter ([#32424](#)) and will be deprecated in [5.1.0](#) ([#36807](#)) and removed in a to-be-determined future release. Do you agree?

#8 - 2022-09-27 04:32 - Go MAEDA

- *Status changed from Needs feedback to Closed*
- *Resolution set to Wont fix*

Do you agree?

Yes, since Redcarpet is going to be removed in the future release and the use of inline styles in CommonMark is discussed in [#37237](#) as you pointed out, I think it is appropriate to close this issue.
