Description For multiple value list custom fields there is no text wrap when displayed as a column on issue list, this breaks page layout. This should be added to application.css: tr.issue td.subject, tr.issue td.category, td.assigned_to, tr.issue td.string, tr.issue td.text, tr.issue td.list , tr.issue td.relations, tr.issue td.parent { white-space: normal; }
