Target version:	3.2.2			
Resolution:	Fixed		**Affected version:**	3.2.1

Description

When uploading a CSV file to import, the delimiter used in the CSV is supposed to be auto-detected.

However, [File.read](#) seems to not be used properly: The third parameter may not be a string.

This is rescued in the block and therefore, the user does not see the error. However, the auto-detection does not work.

Attached is a simple patch that fixes this.
