Redmine - Feature #2273

Date inputs when editing an issue should use localised date format

2008-12-04 06:13 - Richard Nichols

Description

The date format used in Redmine is selectable in the administrator settings.

When not using the default format of 'yyyy-mm-dd', places where dates are rendered read-only, the date is output in the selected localised format, however when actually editing issues, the date fields (e.g. start date) don't use the localised format, they still use 'yyyy-mm-dd'.

From a user perspective this is a little inconsistent and confusing. At least for numeric date formats, it would make sense to adjust the input format according to the selected local alternative.
