

Redmine - Feature #22789

issue status changed with note when I changed the issue status in issue list

2016-05-11 05:53 - Steven Wong

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description for example, when I changed issue status from new to resolved, I want to add some notes. there's some method to do it. 1. I open the issue in details page, clicc [edit] and modify the status and notes, then submit. 2. in issue list, I right click and select the status to resolved, but it can not add notes just changed the status. in the second method, can redmine give dialogbox to add some notes? Thanks.

If you choose "edit" in the issue list (= bulk edit selected issues), then you can change status and add notes (for all the selected issues)

I think I missed something.

Thanks so much.
