Description

I am wondering if it is possible to define relation between the main project version and the sub-projects versions, i.e. if I have main project 'MP' with versions mpv-1, mpv-2, ... and sub-projects 'SP1', 'SP2' with versions spv1-1, spv1-2, ...; spv2-1, spv2-2, ... correspondingly and I want to define that MP mpv-1 consists of SP1 spv1-1 and SP2 spv2-1, so if I review the issues of MP mpv-1 I want to see the issues of SP1 spv1-1 and of SP2 spv2-1. Thanks in advance for any suggestions.
