<b>Description</b>			
<p>I try to install new redmine with mysql Database on a remote maschine . This fails when I try to generate a secret token. Same thing happens at next step when I try to generate a database structure.</p> <p>step 1: bundle exec rake generate_secret_token You have requested: mime-types ~&gt; 3.0</p> <p>The bundle currently has mime-types locked at 2.99.1. Try running `bundle update mime-types`</p> <p>If you are updating multiple gems in your Gemfile at once, try passing them all to `bundle update` Run `bundle install` to install missing gems.</p> <p>The bundle update succeeds fine itself.</p> <p>But the following step fails: RAILS_ENV=production exec rake db:migrate You have requested: mime-types ~&gt; 3.0</p> <p>The bundle currently has mime-types locked at 2.99.1. Try running `bundle update mime-types`</p> <p>If you are updating multiple gems in your Gemfile at once, try passing them all to `bundle update` Run `bundle install` to install missing gems.</p> <p>What is wrong?</p>
