

Redmine - Patch #228
for VisualSourceSafe patches

2007-09-03 00:14 - Aruo Miura

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:			
Description This patch add support SCM : Microsoft Visual Source safe. But all Changeset become 'Modify'. Because of localization of VSS. (All action strings are localized. So need add language dropdown list for repository_helper but I don't know how to do it.)			
Related issues: Is duplicate of Redmine - Patch #1260: Add SCM:Visual SourceSafe patch Closed 2008-05-20			

History

#1 - 2007-09-06 02:30 - Aruo Miura

I forget implement 'get_previous_revision()' so please replace 'visual_source_safe_adapter.rb' for new one.

#2 - 2007-09-25 07:36 - Aruo Miura

Requirements:
Microsft Visual Source Safe 8.0 (maybe or later)
(Not support 6.0 because lack of interfaces)
VSS and redMine are running on same machine.
(Maybe remote DB is acceptable. but I don't check it)

#3 - 2007-11-12 00:58 - Aruo Miura

I update them.
Mainly 'Modify'/'Added'/'Deleted' is working.
Use ICONV instead of NKF.
Repository analyze speed faster(but need much more...)
Maybe support Japanese and English.

#4 - 2008-05-20 21:54 - Jean-Philippe Lang

- Category set to SCM
- Status changed from New to Closed

See [#1260](#).

#5 - 2018-10-07 08:39 - Go MAEDA

- Is duplicate of Patch #1260: Add SCM:Visual SourceSafe patch added
