

Redmine - Patch #2281

Total-columns in the issue summary (issue_report)

2008-12-05 17:45 - Mischa The Evil

Target version:	
Description I was just wondering if it would be useful to have total-columns inside the issue summary (issue_report) and the related issue_report detail-views. Such a functionality would, for example, make it easier to look-up: <ul style="list-style-type: none">• how many issues are open/closed which are targetted to any version.• how many issues are open/closed in general (cross-tracker, thus the total number of issues on a project)• resulting of the above; make it easy to see how many non-versioned issues exists. An example of what I'm talking about could look like: issues_report-mod-new.jpg

Thanks for that patch... It looks quite neat and slick. I like it... :-)

#3 - 2009-01-19 06:36 - Ewan Makepeace

What is the difference between this patch and [#691](#) ?

#4 - 2009-01-19 17:46 - Mischa The Evil

Almost identical. The patch from [#691](#) also provides links on the totals which redirects to the issuelist with the required filters applied. This isn't something I use/require...

AFAICT this patch by Markus Knittig seems a bit more clean without hard-coded strings and so on...

I didn't found [#691](#) before opening this issue... I'll relate them since they both implement it slightly different...

Good eye!

#5 - 2009-03-29 23:57 - Mischa The Evil

- Tracker changed from Feature to Patch

#6 - 2019-02-15 15:24 - Anonymous

It could be a penalty to performance if there are too many versions, too many categories and etc as it introduces additional for loops. This IMHO would be a lot cheaper to do on the front end instead, but it would require correct classification of columns containing numbers.

P.S. possibly this ticket not really related to UI.

#7 - 2024-10-26 08:40 - Go MAEDA

- *Status changed from New to Closed*

Implemented in [r23163](#).
