Redmine - Feature #22810

Request: adding tracker id/name to REST /time_entries response (like we already have project info in responses)

Description

Hi

In order to parse time logs, it's very critical to know the type of the task ("tracker") that the time is spent on. Is it configurable or a patch is necessary ? And in the latter case, what is the maintainers' view on this ?

Thanks a lot !

Kirill
