Target version:	
Description	
Here is the migration created by running rake db:sessions:create.	

History

#1 - 2007-10-09 09:42 - Cyril Mougel

it's not enough. You need define in your environnement.rb a config :

```
config.action_controller.session_store = :active_record_store
```

if you not use this configuration you don't use this session store in your database.

Maybe made a rake file which create and apply this migration is better. Because you need delete it after. If you don't delete it you can be problem with the future migration.

#2 - 2010-05-15 23:57 - Felix Schäfer

- Status changed from New to Closed

AFAIK we have cookie sessions now.
