Redmine - Defect #22975

Moving a wiki page to a different project should refresh parent page list

2016-06-03 14:38 - Karel Pičman

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**

Category:	Wiki		**Estimated time:**	0.00 hour
Target version:	4.0.0			
Resolution:	Fixed		**Affected version:**	

Description

When renaming a wiki page in order to move it to a different project, I change the **Project** in the renaming form first. But, the **Parent page** pick list is not updated according to the selected project. Therefore, it's not possible to set a parent from the target project and I can move it to the root only.

A wrong selection of the **Parent page** leads to *"Parent page doesn't belong to the same project"* error then.

I think that the **Parent page** pick list should be always filled in according to the **Project** selection.

Revision 17284 - 2018-04-07 12:27 - Go MAEDA

Moving a wiki page to a different project should refresh parent page list (#22975).

Patch by Mizuki ISHIKAWA.

History

#1 - 2016-06-04 09:34 - Jean-Philippe Lang

- Tracker changed from Feature to Defect

- Subject changed from Moving a wiki page to a different project to Moving a wiki page to a different project should refresh parent page list

- Status changed from New to Confirmed

- Target version set to Candidate for next minor release

#2 - 2018-03-07 06:31 - Mizuki ISHIKAWA

- File change_the_list_of_parent_pages_when_changing_project.patch added

This problem still exists.
I wrote a patch to solve this problem.

When this patch is applied, the list of Parent Page will change according to Project change.

Nice. Thanks for sharing it here. Can you add some test coverage for this?

#4 - 2018-03-07 09:27 - Mizuki ISHIKAWA

Thank you for reviewing the patch, Mischa The Evil.

Nice. Thanks for sharing it here. Can you add some test coverage for this?

Since there is almost no Ruby code in this patch, so I thought there was no test that could be added.
Is there a place where you can write tests from the perspective of you?

#5 - 2018-03-10 06:55 - Go MAEDA

The patch swaps the positions of "Parent page" and "Project" field. Is it necessary?

#6 - 2018-03-12 07:59 - Mizuki ISHIKAWA

Parent page will be changed by Project change.
If there is a "Parent page" above "Project" (current), I think there is a possibility that I do not notice that the list of "Parent page" has been changed.
If there is a "Parent page" is under "Project", I thought that I could perform an intuitive operation in order from top to bottom, so I changed it.

This change is not absolutely necessary.

#7 - 2018-03-14 04:13 - Go MAEDA

- Target version changed from Candidate for next minor release to 4.0.0

Although Jean-Philippe Lang set the target version to "Candidate for next minor release", I am setting target version to 4.0.0 because the proposed patch changes the UI (swaps the positions of "Parent page" and "Project" field).

#8 - 2018-04-07 12:27 - Go MAEDA

- Status changed from Confirmed to Closed

- Assignee set to Go MAEDA

- Resolution set to Fixed

Committed. Thank you for improving Redmine.
