Resolution:			
Description			
<p>When creating issue and revision links they don't always appear to work in terms of being converted into automatic links.</p> <p>They will sometimes not work if you have immediately have a carriage return.</p> <p>i.e.</p> <p>Issue #19 More text</p> <p>will not work but if you put a space (Or any other character) THEN a carriage return then it will work correctly. (underscore represents a space)</p> <p>Issue#19_ More text</p> <p>On some issues it appeared to even when there wasn't a charracter before the carriage return, I can't account for that.</p> <p>I have only seen it fail when it is immediately followed a carriage return, maybe some sort of Regexpt issue?</p>			

History

#1 - 2007-03-20 14:09 - Jean-Philippe Lang

The only case when it fails for me is when [#7777](#) is at the end of the text (note of the line).

I've simplified the regexp and it should be more accurate:
/##(d+)(?=\b)/
Fix has just been committed in the trunk

Tell me if it solves your problem.
Thanks

#2 - 2007-03-23 07:32 - Jeffrey Jones

I have retested with new trunk export and have been unable to break it. Looks like it is fixed.

Many thanks

Jeff

#3 - 2007-03-23 09:29 - Jean-Philippe Lang

Thanks.
