<b>Target version:</b>		<b>Affected version:</b>	2.6.5
<b>Resolution:</b>			

#### Description

Hi,  
I'm using Redmine 2.6.5. We've tried to set the redmine\_session cookie as secure in application.rb like this:

```
config.session_store :cookie_store, :key => '_redmine_session', :secure => true
```

However, when we try to login in Redmine, a 422 error happens:

422

Invalid form authenticity token.

[Back](#)

Is this the correct way to achieve this? Or is this solved in another version?

Thank you.

#### History

#1 - 2016-06-13 15:33 - Toshi MARUYAMA

- Status changed from New to Closed

Please use forum for question and Redmine 2.6.x is not maintained.
