<b>Description</b>			
Error with Fetch commits automatically with mercurial repository			
When I add a mercurial repository, redmine start to scan and add to Mysql. This take several minutes. When redmine finish to index .Redmine show a error page. In production.log show this message. It happen with a huge repository about 70335 commits

I haven't any exit on scm\_stderr\_log\_file. -> I try to say: I haven't any error related with this issue. Only have this message:  
not trusting file /home/share/mirror/hg/all/.hg/hgrc from untrusted user root, group www-data

It can be solve with adding in hgrc.

hg in command line:

Mercurial Distributed SCM

basic commands:

add	add the specified files on the next commit
annotate	show changeset information by line for each file
clone	make a copy of an existing repository
commit	commit the specified files or all outstanding changes
diff	diff repository (or selected files)
export	dump the header and diffs for one or more changesets
forget	forget the specified files on the next commit
init	create a new repository in the given directory
log	show revision history of entire repository or files
merge	merge working directory with another revision
pull	pull changes from the specified source
push	push changes to the specified destination
remove	remove the specified files on the next commit
serve	start stand-alone webserver
status	show changed files in the working directory
summary	summarize working directory state
update	update working directory (or switch revisions)

use "hg help" for the full list of commands or "hg -v" for details

Maybe a wrong code of EOL?. I see in sublime editor a DC3 code.

#### #12 - 2016-06-14 18:28 - mole mole

I think that double !! can break it.

The message in mercurial is:

```
-dimensiones de los geosets de m3Font funcionando bien con shader.!!
```

and the output of script have a DC3 code when in original have a !!:

```
<msg>-dimensiones de los geosets de m3Font funcionando bien con shader.</msg>

**#28 - 2020-03-26 02:41 - Toshi MARUYAMA**

- Status changed from Confirmed to Closed
- Target version set to 4.2.0
- Resolution set to Fixed

I choose 'urlescape' because 'paths' uses 'urlescape' and decodes it.
