

Redmine - Defect #2311

r2097 breaks issues layout

2008-12-10 16:16 - Rodrigo Rosenfeld Rosas

Status:	Closed	Start date:	2008-12-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		

Description

Since [r2097](#) stylesheets/application.css change, the issues page is not rendered correctly when the content is too large. Before the patch, the content had scrollbars.

Updating stylesheets/applications.css to [r2046](#) (last change before [r2097](#)), the problem is gone.

Removing "overflow: auto" from #content was the cause of the problem.

Here is the suggested patch.

History

#1 - 2008-12-15 19:09 - Jean-Philippe Lang

I don't really see how [r2097](#) can affect this. Can you provide an example please?
By the way, is it the issue list or the issue detail view that is affected?

The affected part that I noted was the tickets list when the table has lots of columns (fields). I've tested both in Opera and Firefox. The suggested patch worked for me. I always use the svn last version on my production system, so I've noticed just after the [r2097](#) commit. Applying the patch solved for me.

Please, take a look at the above link for information about the overflow property and how it is related to scrolling:
<http://www.w3.org/TR/CSS21/visufx.html#propdef-overflow>

#3 - 2009-12-18 00:08 - Mischa The Evil

- Category changed from Issues to UI
- Status changed from New to Closed
- Priority changed from Urgent to Normal
- Resolution set to Fixed

Fixed in [r3177](#).
