

Redmine - Defect #23182

url in email + sub uri = sub uri duplication

2016-06-28 00:05 - Evgeniy Dushistov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	3.2.1
Resolution:	Duplicate		
Description			
I configure redmine to be https://server/redmine via			
<pre>RedmineApp::Application.routes.default_scope = { :path => '/redmine', :shallow_path => '/redmine' }</pre>			
<pre>#RedmineApp::Application.routes.default_scope = "/redmine" # Initialize the Rails application Rails.application.initialize! Redmine::Utils::relative_url_root = "/redmine"</pre>			
all works fine, except links in email - they looks like: https://server/redmine/redmine/issues/1#change-31			
I have set hostname to server, and protocol to https via Administration->Preference->General
